DATA SHEET

RIPPENSTRECKMETALL - High ribbed 21 mm

Description

The ribbed expanded metal made of galvanised sheet steel is used as permanent formwork. Due to the rib height of approx. 21 mm and the special profiling, it is extremely strong and ensures a perfect bond of the construction joints.

Application

The ribbed expanded metal is used, for example, as lost formwork for construction joints or quiver formwork. For this purpose, the ribbed expanded metal is cut to the desired shape / size and bent. The usability of the product in the respective installation situation must be checked by the user!

Material

- Galvanised steel sheet
- Free from PVC, CFC and HFC
- Without substances of very high concern according to ECHA candidate list (REACH Regulation)

Packaging

- Free of halogen-containing compounds, azo dyes, flame retardants
