DATA SHEET

DRUPAK "1" - flat on top, plugged

Description

Large-area and extra strong spacer, mainly for lower reinforcement. Extra good concrete flow because of large side and top cut-outs. Only limited suitable for fair-faced concrete and prefabricated slabs. Due to the better tilting stability, we recommend Drupak "2" from a concrete cover of 40 mm. Can be extended as required with plug-in coupling, production length 1 m.

Application

The spacer is laid diagonally to the reinforcement to ensure the required concrete cover. The usability of the product in the respective installation situation must be checked by the user! Further information on the arrangement and installation distances can be found in the relevant DBV leaflets.

Material

- Polyolefin PO (High-density polyethylene HD-PE + Polypropylene PP)
- Free from PVC, CFC and HFC
- Without substances of very high concern according to ECHA candidate list (REACH Regulation)

Packaging

- Free of halogen-containing compounds, azo dyes, flame retardants

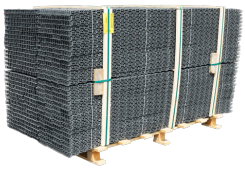
Available standard lengths: 1.00 m and 2.00 m.
Tested according to DBV leaflet „Abstandhalter“ DBV - c - L2/F/A.

Packaging:

- Due to its special design, the Drupak is ideal for stacking, which results in optimal freight cost savings and storage space utilisation.
- Storage of 3 pallets on top of each other is possible without any problems.
- Up to 78 % more on the pallet compared to Drunterleisten.



Note: Protect from direct sunlight during storage.
