DATA SHEET

FASERBETON ROHR FIXLÄNGE

Description

Pre-cut fibre-reinforced concrete tube for the production of formwork clamping points on the construction site. Suitable for tie rods with DYWIDAG thread 15 mm.

Test certificates available:
- Watertightness test
- Fire behaviour F180
- Airborne sound insulation
- Drinking water suitability

Application

The fibre-reinforced concrete tube is used to maintain the distance between the formwork and to pass through the tie rod. Optionally, the optical appearance of the finished concrete surface can be influenced by using different cones. The usability of the product in the respective installation situation must be checked by the user! Further information on the arrangement and installation distances can be found in the relevant DBV leaflets.

Material

- Fibre-reinforced concrete
- Free from PVC, CFC and HFC
- Without substances of very high concern according to ECHA candidate list (REACH Regulation)

Packaging

- Free of halogen-containing compounds, azo dyes, flame retardants
