

SPANNGURT MULTISTRAP - with 2 wing nuts**Description**

Multistrap tensioning strap with two wing nuts and threaded connection for attaching push-pull props for erecting formwork tubes. Suitable for all diameters.

Application

When setting up, do not force the formwork tubes over reinforcement or spacers that may be bent too large. Position on the foundation side in the axis and fix with a wooden cross. With square and rectangular pipes as well as special shapes, pay attention to the alignment of the formwork pipes. On the ceiling side, adjust the formwork vertically with tension belts and on-site tension and pressure-resistant push-pull props and secure against uplift.

Please also check the technical application notes at <https://www.nevoga.com/en/formwork-systems/>

The usability of the product in the respective installation situation must be checked by the user!

Material

- Free from PVC, CFC and HFC
- Without substances of very high concern according to ECHA candidate list (REACH Regulation)

Packaging

- Free of halogen-containing compounds, azo dyes, flame retardants
