DATA SHEET

STAPELHILFE - with cross studs, hard

Description

Stacking aid with cross studs for the storage and transport of precast concrete elements. Protects the visible surfaces of the concrete elements and reduces the risk of injury when storing the concrete elements. The stacking aid can be attached to the concrete elements both from above and from the side.

Application

The Stapelhilfe is clamped between the concrete elements to be stored. Due to its shape, the Stapelhilfe can also be clipped onto the concrete elements from the side. The usability of the product in the respective installation situation must be checked by the user!

Material

- Acrylonitrile butadiene styrene copolymer (ABS)
- Free from PVC, CFC and HFC
- Without substances of very high concern according to ECHA candidate list (REACH Regulation)

Packaging

- Free of halogen-containing compounds, azo dyes, flame retardants
